

2+i Industry-Academia Collaboration Program, Cheng Shiu University		
Program	Number of admissions	Classes begin
1. Civil Engineering	40	Fall 2019
2. Food & Beverage Management	40	Fall 2019
3. Mechanical Engineering	40	Fall 2019

Cheng Shiu University (CSU) is the best University for 2019 Spring 2+i program student recruitment in educational collaboration with Indonesia.

This “**2+i Civil Engineering Program**” aims to train those Indonesian students with Diploma 3 (Associate Degree Level 3) to learn more theoretical and practical knowledge and to achieve core competencies on civil engineering through both on-campus coursework and off-campus internship. It is designed as a 3-year program, including the first three semesters for coursework and the rest for off-campus internship. Based on the Civil Engineering Curriculum Framework certified by the IEET (Institute of Engineering Education Taiwan), this program’s course planning is in line with international engineering education standards to involve in the industrial development and trend, offering specialized training in civil engineering and spatial information and preparing students to be competent for their future career or to pursue a higher graduate study. To full-fill the degree requirements, students must complete a minimum of 72 course credits and will be conferred a Bachelor’s Degree upon completion of the study. In general, this program is expected to promote the collaborative relationship in vocational education and industrial development between Indonesia and Taiwan, and has invited three enterprises to work in close partnership to support practical teaching and develop the internship course. Among these three cooperative enterprises, the internship offered by Bai Sheng Construction Co., Ltd. is mainly on construction engineering, while Changsheng Engineering Co., Ltd. on waterproofing engineering related practical training, and Taiye Enterprise Co., Ltd. on construction materials production, management and R & D Technology, respectively. We will offer a full scholarship to those students who enroll in this program. The scholarship details include the first-year tuition & miscellaneous fee exemption, a monthly

stipend of NTD 5,000 for living expense in the first five months and free on-campus accommodation until the off-campus internship commences.

Cheng Shiu University (CSU) is the best University for 2019 Spring 2+i program student recruitment in educational collaboration with Indonesia.

This “**2+i Food & Beverage Management Program**” delivers training courses to those Indonesian students with Diploma 3 (Associate Degree Level 3) in order for them to learn more theoretical and practical knowledge and to achieve core competencies on food & beverage management through both on-campus coursework and off-campus internship. It is designed as a 3-year program, including the first three semesters for coursework and the rest for off-campus internship. To full-fill the degree requirements, students should complete a minimum of 72 course credits and will be conferred a Bachelor’s Degree upon completion of the study. In general, this program expects to promote the collaborative relationship in vocational education and industrial development between Indonesia and Taiwan and its curriculum will prepare students to be competent for the job market in food and beverage and for the pursuit of graduate study. This program has invited a couple of enterprises to work in close partnership to support practical teaching and develop the internship course. We will offer a full scholarship to those students who enroll in this program. The scholarship details include the first-year tuition & miscellaneous fee exemption, a stipend of NTD 5,000 for living expense in the first five months and free on-campus accommodation until the off-campus internship commences.

Cheng Shiu University (CSU) is the best University for 2019 Spring 2+i program student recruitment in educational collaboration with Indonesia.

This “**2+i Precision Engineering Program**” provides training courses to those Indonesian students with Diploma 3 (Associate Degree Level 3) to learn more theoretical and practical knowledge and to achieve core competencies on Precision Machinery through both on-campus coursework and off-campus internship. Based on the Mechanical

Engineering Curriculum Framework certified by the IEET (Institute of Engineering Education Taiwan), this program primarily focuses on precision machinery, offering specialized training in machining that includes fundamental mechanical, manufacturing and design analysis skills, material engineering, integrated computer manufacturing as well as CAD/CAE/CAM/CAI to prepare students to be employed readily. This program is expected to promote the collaborative relationship in vocational education and industry between Indonesia and Taiwan, organizes a 3-year time and a minimum of 72 course credits to fulfill the degree requirement, with 3-semester on-campus coursework and 3-semester off-campus internship. Upon completion of the study, students will be conferred a Bachelor's Degree. Three strategic partners have been invited to join in the program, offering hands-on experience on precision manufacturing. Among them, Hua Yong Machine Industry and Magnate Technology Company help on product's auto & motor parts and aviation/aerospace components, and Jong Shyn Shipbuilding Company helps in the field of integrated marine mechanical engineering. We will offer a full scholarship to those students who enroll in this program. The scholarship details include the first-year tuition & miscellaneous fee exemption, a monthly stipend of NTD 5,000 per month for living expense in the first five months and free on-campus accommodation before the off-campus internship commences.
